PROJECT

PROJECT NAME

FOOD ORDERING

DESCRIPTION

Developed a food ordering website using the MERN stack, enabling users to browse and order meals online. Implemented full CRUD operations for managing food items and integrated Stripe for secure payment processing. The project features user authentication, order tracking, and a responsive UI for an optimal user experience.

TECHNOLOGY USED:

FRONTEND: HTML, CSS, REACTJS

BACKEND: EXPRESSJS ,MONGODB

PROJECT NAME

Finance Tracker

DESCRIPTION

Created a finance tracker application using React.js and Firebase, designed to monitor daily income and expenses. Integrated Ant Design (Antd) for visually appealing charts and graphs to display financial data. The project features user authentication, real-time data updates

TECHNOLOGY USED: HTML, CSS, REACTJS ,FIREBASE
